

PALM SHORES

THE CHALLENGE

Palm Shores called for a refined hardware solution to complement its sculptural architecture, premium finishes and absolute beachfront setting. Every detail needed to reflect the quality and understated luxury of the residences.

THE SOLUTION

Entro worked with 5 Point Projects and Plus Studio to deliver a coordinated architectural hardware package aligned with the project's material palette and design intent.

THE OUTCOME

The completed hardware integrates seamlessly throughout Palm Shores, adding a considered finishing touch to a highly resolved coastal development.

We worked closely with 5 Point Projects to deliver a complete architectural door hardware suite, balancing design, functionality and consistency throughout.
