

BOLTON CLARKE, BUNDOORA

THE CHALLENGE

Callisto Place required architectural hardware that balanced accessibility, security and ease of use with the refined, residential character of the development.

THE SOLUTION

Entro developed a coordinated hardware package across the apartments and shared spaces, with selections focused on functionality, durability and consistency with the interior palette.

THE OUTCOME

A cohesive hardware solution that integrates naturally throughout Callisto Place, supporting a safe and comfortable environment while complementing its contemporary residential character.

It was important that every hardware selection balanced everyday functionality with the comfort and quality of a residential setting.
